

New in ScanFile Version 9

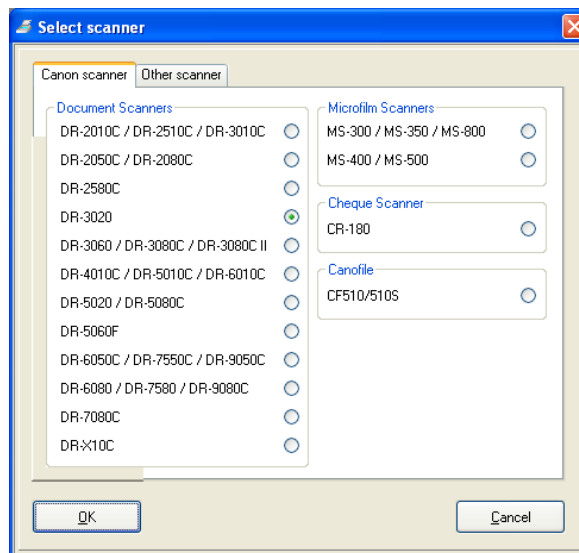

ScanFile is 64bit compatible

ScanFile is now available for Microsoft® 32bit and 64bit operating systems.

Additional Canon® Scanners supported

The additional supported Canon® scanners are available with Version 9:

DR-2010C, DR-2510C, DR-3010C,
DR-2580C,
DR-4010C, DR-5010C, DR-6010C,
DR-6050C, DR-7550C, DR-9050C,
DR-X10C

Directory Scanner

The Directory Scanner combines the simplicity of a file import with the automatic processing routines of a scanner. This allows pages to be rotated or excluded dependent of a content threshold from the import.

New VNP

The new VNP version can print color documents and store them in ScanFile.

ScanFile WebServer and ScanFile RemoteStation have finished their product lifecycle. These programs are for 32bit operating systems before Windows Vista and generally not for 64bit operating systems available.

Existing customers of ScanFile WebServer or ScanFile RemoteStation are asked to contact their dealer.
